

Dr. Wardlaw and her staff for your concierge surgical needs. Please use this check-list as ase the day of surgery. Feel free to contact us with any questions or concerns as they

All surgery patients should have radiographs & appropriate bloodwork performed prior to the morning of surgery. Please make sure you are allotting your staff enough time to check skin for possible infection issues, for IV catheter placement, & for drugs to be calculated & prepared *before* we arrive for surgery. Surgery forms & anesthesia protocol suggestions can be found on our website. www.gatewayvetsurgery.com
